OBJECTIVE

Motivated and detail-oriented software engineer with strong foundations in front-end development, full stack technologies, and data science. Seeking a Junior Front End Developer role to apply my skills in HTML, CSS, JavaScript, and React while contributing to scalable, user-friendly web applications. Passionate about building responsive interfaces and solving real-world problems through clean code and collaborative development.

PROJECTS

Student Mart - Full Stack Marketplace

Designed and deployed a student-focused e-commerce platform using HTML, CSS, JavaScript, MySQL. - Implemented secure authentication, dynamic product listings, and real-time bug fixes - Managed deployment and performance optimization for scalable usage

Predictive Analytics for Course Outcomes

Built regression models to forecast student performance with 92% accuracy. Applied feature engineering and hyperparameter tuning for model optimization. Delivered actionable insights to improve academic planning.

Fake News Detection App

Designed and deployed a responsive web application to classify news articles as real or fake using machine learning. Built the front end using HTML, CSS, JavaScript, TypeScript, Tailwind CSS and React, with clean UI/UX for intuitive user interaction. Integrated model predictions and dynamic content rendering to deliver real-time classification results. Demonstrates strong problem-solving, data handling, and full stack development capabilities.

Fetal Health Classification System (ML + Explainable AI)

Developed a machine learning-based fetal health classification system using XGBoost to predict fetal conditions with high accuracy. Integrated SHAP (SHapley Additive Explanations) to provide transparent and interpretable predictions for medical insights. Built a user-friendly web interface to display results and model explanations. Applied feature engineering and model optimization techniques to enhance performance and reliability.

EDUCATION

2022 - present	Btech degree Vasireddy Venkatadri Institute of Technology	(7.13/10.0)
2022	Intermediate State Board (Andhra Pradesh)	(66.5 percentage)
2020	Class 10th State Board (Andhra Pradesh)	(100 percentage)

CERTIFICATIONS

Python (Udemy) HTML and CSS (IBM)
Gen AI Data Analytics (Meta)
Introduction to Cloud computing (IBM)

SKILLS

Languages	Python, JavaScript, SQL, HTML, CSS, React, Java, TypeScript
Frameworks & Libraries	FastAPI, Django, Flask, React, Pandas, Numpy, Matplotlib
Tools and Platforms	Git, Git Hub, SQL, MySQL, SQLite, Firebase, MongoDB
